STOPTECH NEW PRODUCT ANNOUNCEMENT: STAINLESS STEEL LINES FOR NISSAN 240SX

Los Angeles (September 02, 2008) – StopTech, a leading manufacturer, supplier and innovator of world class brake components and brake systems for production-based race cars and high performance vehicles on the street and track, today announced it has released new stainless steel brake lines for Nissan 240SX owners who have upgraded to 300ZX brakes.

The new offerings from StopTech, the ultra-performance division of Centric Parts, cover 240SX models from 1989 to 1998. Different lines sets are offered for the front (part #950.42013) and rear (part #950.42510). All StopTech stainless steel lines are DOT-compliant and feature a Teflon inner hose supported by a layer of woven stainless steel braid that is wrapped in a clear PVC plastic cover, providing added protection from debris and abrasion. StopTech's stainless steel lines are pressure tested to 4500psi and offer more precise brake modulation and firmer pedal feel.

This new StopTech release is a welcome option for Nissan 240SX owners who already have or are looking to upgrade to 300ZX brakes, which is a direct swap in nearly every way – except for the brake lines, which have been something of a headache until now. StopTech's stainless steel lines are a fully-engineered upgrade, connecting the 300ZX calipers directly to the OE hard lines on the body. This StopTech upgrade not only makes the most of the performance to be gained with this economical brake interchange, it simplifies the installation considerably.

StopTech was the first to offer balanced brake upgrades for production cars and remains the worldwide leader with over 600 platform offerings to dramatically improve overall braking performance. StopTech's industry leading technologies and materials, from rock solid calipers to ingeniously efficient heat handling rotors, result in shorter stopping distances, better brake modulation, and less brake fade. StopTech products can be purchased through automotive aftermarket parts stores, suppliers and online retailers. Check with retailers for pricing.

Centric Parts (www.centricparts.com) continually innovates significant improvements to brake technology for the street and track, having earned four patents along the way, providing superior performance, quality and value. Centric Parts offerings include PosiQuiet premium Metallic, Ceramic and Extended Wear formulas, an OE product line, plus Axxis and C-TEK standard grade materials. StopTech (www.stoptech.com), Centric's ultra performance division, is a leading innovator of world class brake components and systems for production-based racing cars and high performance vehicles on the street and track. Power Slot (www.powerslot.com),

Centric's performance division, focuses on entry level brake upgrade solutions and pioneered direct fit performance rotors for trucks, SUVs and severe duty vehicles.
